

SINA JAZAERI

Python Developer — Backend (Django/DRF) & Web Scraping / Automation

Istanbul, Turkey | +90 506 369 9644 | Sina.eng3925@gmail.com | [linkedin.com/in/sina-jazaeri](https://www.linkedin.com/in/sina-jazaeri) | github.com/SinaJazaeri

PROFESSIONAL SUMMARY

Python developer based in Istanbul, building backend skills with Django and Django REST Framework by shipping a real, deployed API — including data modeling, authentication, automated testing, and production deployment — alongside a strong existing foundation in web scraping and automation (BeautifulSoup, Selenium, Playwright). Comfortable working independently across the full pipeline, from data extraction to a live, tested API. Strong communicator with a background in international business (IELTS 7, Advanced Turkish), based in Istanbul with easy access to European time zones.

TECHNICAL SKILLS

- Languages & Frameworks: Python, Django, Django REST Framework, HTML/CSS
- Backend: RESTful API design, ORM & relational data modeling, authentication (Session/Token), per-endpoint permissions, automated testing (Django TestCase)
- Deployment: Render, PostgreSQL (production), Gunicorn, WhiteNoise, environment-based configuration
- Web Scraping & Automation: BeautifulSoup, Selenium, Playwright, Requests, scheduled/cron-based jobs
- Data Handling: Pandas, CSV/JSON, Excel
- Tools: Git, GitHub, PyCharm, PostgreSQL, SQLite
- Other: WordPress, Photoshop, SEO — from prior business/marketing roles

PROJECTS

fintech-practice — Deployed REST API for Exchange Rate Tracking

Python, Django, DRF, PostgreSQL

- Built and deployed a full REST API — models, serializers, ViewSets, a custom action endpoint, and per-action permissions — with three authentication schemes and automated test coverage (models, views, and API, including negative tests).
- Live at fintech-practice.onrender.com, deployed with Gunicorn, WhiteNoise, and a managed PostgreSQL database.

Che Qonam — Platform for Iranians in Turkey (in progress)

Python, Django, DRF, PostgreSQL, Playwright/BeautifulSoup

- Building a Django platform end-to-end; the Fintech module combines a live scraping pipeline (Playwright/Telegram) with a Django REST API layer serving raw rate history and computed final rates.
- Personal project used to learn production-grade backend architecture through a real, evolving use case.

Telegram Price Poster Bot

Python

- Automated Telegram bot that fetches live currency exchange rates and auto-generates visual price posters for posting.
- Public repository: github.com/SinaJazaeri/Telegram-Price-Poster-Bot

Web Scraper & Data Pipeline

Python, BeautifulSoup, Pandas

- Built a scraper for public listing/price data with scheduled runs and CSV/Excel export for downstream analysis.

PDF Data Extraction Tool

Python, PyPDF2, ReportLab

- Built a script to extract structured data from PDF documents and generate formatted output reports.

Multi-Threaded Port Scanner

Python, Sockets, Threading

- Built a multi-threaded network port scanner using queue-based threading, with JSON report output.

WORK EXPERIENCE

Freelance Python Scripting & Automation — Self-Employed

2022 – Present | Remote / Istanbul

- Took on a small number of independent Python scripting and automation tasks alongside self-directed skill-building in scraping and backend development.

Technical & Commercial Expert — Aria Basirat Pharma

2020 – Present | Tehran / Remote

- Managed digital marketing, SEO, and data analysis; designed and maintained the company website.

Commercial Expert — IPON

2016 – 2019 | Tehran

- Handled international marketing, price negotiation, and tender management.
- Awarded "Employee of the Year" twice for outstanding performance.

EDUCATION

B.Sc. in Computer Engineering (ongoing) — T.C. Istanbul Atlas University

2023 – Present | Istanbul, Turkey

B.Sc. in Civil Engineering — Qazvin University

2014 – 2018 | Qazvin, Iran

LANGUAGES & CERTIFICATIONS

- English — Professional (IELTS Academic 7.0)
- Turkish — Advanced (Daily & Business)
- Persian — Native
